

Folding instructions

1. Fold Diagonally

Fold your square paper in half diagonally to make a triangle.

Open it, then fold it diagonally the other way.

You now have two creases that cross in the center.

2. Fold the Corners to the Center

Lay the square flat.

Bring each corner into the middle point where the creases meet.

You should now have a smaller square.

3. Flip and Repeat

Flip the paper over.

Fold each corner into the center again to make an even smaller square.

4. Create Opening Creases

Fold the square in half horizontally and open it.

Fold it in half vertically and open it.

These folds help the fortune teller move smoothly.

5. Form the Finger Pockets

Turn the paper over so the flaps face up.

Slip your fingers under the four pockets on the back.

Pinch the sides together to pop it into its 3D shape.

6. Ready to Play!

Open and close the fortune teller by pinching your fingers.

You're ready to reveal a fun Elf task

Example Sequence

The player picks "4." You spell out F-O-U-R while opening and closing the fortune teller.

New numbers appear. They pick "7." You move the fortune teller 7 times.

Then they choose a final number. You lift that flap and reveal the Elf prompt underneath.
